PROJECTS

- **Resume builder**
  "This website is a user-friendly web application that makes it easy to create a resume with 4+ customizable layouts. The app ensures a seamless experience across devices with responsive layouts for mobiles, laptops, and tablets. Users enter personal, educational, and professional information through an intuitive interface.Resume gets downloaded in one click"
- **Maintaining our college website and adding new features**
  Currently working as part of a five-member team and adding new features to the college website.
- **OTT App** [LINK]
  Built a fully functional responsive OTT website having all the features of a modern ott app like search,add to playlist and also has a movie description page which contains the complete information about the movie like movie description, cast etc. The technologies involved here are Reactjs ,Redux js.

- **E-Commerce Website**
  Developed an e-commerce website which is responsive and contains all the features of an e-commerce website like add to cart,login,logout,complete product details page,and a buy now button which will instantly take you to the checkout page.
